 Go Vap District, Ho Chi Minh City

SUMMARY

Game Designer with hands-on experience designing and iterating mobile game systems from concept to prototype. Strong focus on core gameplay loops, player progression, and retention-driven design, supported by game analysis and player behavior insights. Experienced in translating research into actionable gameplay improvements and building playable prototypes to validate ideas. Looking to contribute at a Junior Game Designer level, especially in gameplay systems and prototyping.

EXPERIENCED

EBIZWORLD

Unity Developer Intern

11/2024 - 02/2025

- Designed enemy behavior and difficulty scaling to enhance gameplay challenge
- Structured level flow and gameplay pacing
- Contributed to gameplay systems and player interaction design
- Collaborated with team to refine game feel and user experience
- Participated in debugging and iteration cycles to improve gameplay quality

Athena Studio

Game Research Assistant - Gameplay (Contractor)

04/2025 - 2/2026

- Analyzed top-performing mobile games in Casual & Hybrid-Casual genres
- Broke down core gameplay loops, retention mechanics, and monetization strategies
- Identified player behavior patterns and session design trends
- Delivered actionable insights to support feature design and product decisions
- Evaluated UX flow, game feel, animation, and VFX impact on player engagement

NexZap Studio (Startup)

Game Designer - QC (Remote)

10/2024 - Present

- Designed and developed multiple mobile game prototypes from concept → playable → iteration
- Defined core gameplay loops, player goals, and progression systems
- Balanced gameplay using playtesting feedback to improve engagement and retention
- Iterated features based on player experience and usability issues
- Managed full development cycle independently, including system design and implementation

SKILLS

Game Design:

- Core Loop Design
- Player Progression & Balancing Level Design & Difficulty Curve Gameplay Systems Design
- UX & Player Feedback Design

Tools & Tech:

- Unity, C#
- PlayFab, Firebase
- Git, Trello

Other:

- Game Analysis (Casual / Hybrid-Casual)
- Documentation (GDD, Feature Breakdown) Rapid Prototyping

EDUCATION

Van Hien University

Computer Science

2021 - 2025

PROJECTS

Pig Adventure (2D Action Game)

Tech: Unity, C#.

- Designed core gameplay loop (run → avoid obstacles → score → retry) Balanced obstacle frequency and difficulty progression
- Built player feedback system (UI, score, effects) to improve engagement Defined basic state management and game flow

Góc Em (In Development) - 3D Cafe Simulation Game

Tech: Unity, C#.

- Designed player task loop and progression system
- Built customer behavior flow and interaction mechanics
- Structured gameplay systems for scalability and future expansion Designed UI system and player interaction flow
- Focused on optimizing gameplay experience and system organization

HONORS & AWARDS

- Gold Prize – Academic Competition Season 2 (2024).
- Incubation Prize – MAMMOTHON Hackathon (2025).
- Consolation Prize – Game Idea & Program Contest (2024).
